The resonance on the first blue light day 2022 was so large, which lay there more near these to repeat, on invitation of the commander of the Weidener artillery battalion 131, Lieutenant Colonel Thorsten Wallschus, on the day of the open door of the battalion. ## **The motto: "Hand in hand - separated in colors, united in cause!"**

A large common blue light family, which in constantly growing disaster cases show how important it is to have well-equipped and well-trained blue light organizations and emergency forces. Also the ever further sinking respect opposite task forces up to physical assaults show an untenable condition, which one must oppose united.

Behind every uniform there is a person who is committed to providing immediate help as soon as it is needed and/or there is an emergency. These helpers have earned respect as well as recognition and with the Blue Light Day signs are set.
